Aviation Policy & Strategy

Preliminary application form
Aviation and Climate funding programme

Version 05.06.2026

1 Applicant

Company: Name and address	Contact: Name, role and email address	Deputy contact: Name, role and email address

Description of applicant - Business activities, relevant experience

2 Project

Project title	
Field of application	☐ SAF ☐ Fleet efficiency ☐ Operating efficiency ☐ Knowledge transfer ☐ Alternative propulsion ☐ Other

Earliest possible project start	Latest possible project start	Project duration

Project description - Goal, procedure, partners incl. role and status of cooperation - Project risks and risk mitigation measures - Follow-up plans

3 Technology

	At project start	At project end
Technology readiness level (TRL)		

Description of technology - Functionality, innovation of the measure, status of scaling - Benchmarking against existing technologies and processes - Technology risks and risk mitigation measures - Follow-up plans (further development)

4 Environmental impact

	Minimum value (in t CO_{2eq})	Maximum value (in t CO_{2eq})
Reduction of GHG emissions including upstream and downstream processes over the lifetime of the measure, including operation		

Description of environmental impact - Methodology and assumptions (including the baseline scenario) used to calculate the reported GHG emissions reduction - Attribution of emissions reductions (system boundaries and beneficiaries in Switzerland) - Follow-up plans (scaling) and long-term GHG emissions reduction potential - High-level assessment of environmental impacts (effects on local air quality, water, soil and human health), including risks and measures to mitigate risks - Comparison with similar existing technologies or processes in terms of climate and environmental impacts

5 Finances

Form of funding (select all potential options)	☐ Grant ☐ Loan ☐ State guarantee

	Expected amount (in CHF)	Uncertainty range (in %)
Total costs		
Own funds (including partners)		
Debt capital		
Other grants		
Funding requested from FOCA		

Description of finances

- Business case and financing of the measure, including a description of funding sources and their current status
- Value creation in Switzerland
- Comparison with relevant benchmarks (cost per tonne of SAF and/or cost per tonne of CO_2 reduction)
- Economic risks and measures to mitigate them
- Own contributions, justification of the funding need, and preferred form of support
- Follow-up plans
